**Do your employees carry out activities that requires them to work near or over water?**

The Safe Work Near or Over Water Awareness Course is designed for those employees who work near or over water as part of their job role. The course aims to make candidates aware of the hazards associated with water and provide them with basic land based rescue skills and therefore enable them to work safely near water.

This is a level 1 Water Safety Course which provides the minimum training for those working near water . It also enables a sound basis for further training at a higher level.

For more information regarding this course, venues, dates or general information please contact us.
